## TO OUR MARKET GARDEN CUSTOMERS:—

We take pleasure in handing you our 48th annual catalog, and take this opportunity of wishing you a prosperous year this coming season.

The outcome of any crop is limited by the breeding, care and work expended on the seed before it is planted, so we have spared no effort to produce strongly germinating, vigorous seed that will breed productively and true to type. We will also try to deliver them to you with prompt, efficient, and courteous service. For the growing season, weather and market we hope for the best.

We recommend that besides your favorites you try some of the newer varieties this year particularly Unrivalled Wax Beans, McCreas Bush Lima Beans, New Bunch Carrot, Golden Self Blanching Tall Celery, Hybrid Corn, Conn. Valley Globe Onion, Woodruff's Colossal Pepper, Laxton's Progress Peas, Rutgers and Pritchard Tomato.

Please bear in mind that the prices in this catalog are cash with order. When special arrangements are made and credit is given, the prices must necessarily be higher. The various banking agencies are the proper authorities to secure credit at the lowest cost.

## HYBRID SWEET CORN

**SPANCROSS C2**—Is the outstanding early hybrid, as early as Woodruff's Early Yellow, it has a large ear (6½ inches long, 12-16 rowed average weight .32 lbs.) on every stalk. It is nearly immune to bacterial wilt and matures its crop nearly all at the same time.

Per lb., 50c.; Pk., \$5.00; Bu., \$20.00

**MARCROSS P39**—Although it is about 5-7 days later than Extra Early Yellow and Spancross C2, it has the largest ear of the early hybrids. Its ears 7½ inches long, 10-16 rowed average weight .34 lbs. Are of excellent quality and flavor.

Per lb., 40c.; Pk., \$4.00; Bu., \$15.00

**WHIPCROSS P39**—This hybrid is ideal for the market gardener who desires a high quality, large eared Corn maturing just after Whipple's. The ears are 7½ inches long, 10-16 rowed average weight .34 lbs. and excellent flavor.

Per lb., 40c.; Pk., \$4.00; Bu., \$15.00

**GOLDEN CROSS BANTAM** — (3-5 days later than Whipcross P39 or about same season as Bantam Evergreen) is the best known hybrid. Its ears are 7½ inches long and slender, 10-14 rowed .29 lbs. and of excellent flavor.

Per lb., 50c.; Pk., \$5.00; Bu., \$17.50

MARCROSS

For comparison's sake we give you the average yield per acre during 1934 at the Conn. State Experimental Farm. Understand that this table will show you the comparative yields only. On account of difference in fertility, weather, growing conditions, etc., they do not mean you will get 12,000 ears per acre of Marcross P39, and 8,000 ears per acre of Woodruff's Early Yellow. They do mean that under average conditions Marcross P39 will produce, 50% more ears than Early Yellow.

We repeat last years statement and urge you to plant hybrids instead of straight varieties for, increased yield, uniformity, better quality. One trial and you will never plant anything else.
